ForgeBox API Method: entries

Returns code entries according to passed in parameters or using default values.

URL:

`http://www.coldbox.org/api/forgebox/{format}/entries`

Formats:

- xml
- json

HTTP Method(s):

- GET

Parameters:

- **orderby** (optional) : The ordering to impose in the results. Available order keywords are:
 - *New*
 - *Recent* (Default)
 - *Popular*
- **maxrows** (optional) : The max records to retrieve. By default we return all records (defaults to 0)
- **startrow** (optional) : The offset to use when paging records. By default we return all records (defaults to 0)
- **type** (optional) : The type slug to filter the results with. You will need to use the ForgeBox type slugs in order to make this work. Please see the [types method](#)

Usage examples:

Below is a simple example using curl ([about cURL](#))

- `curl http://www.coldbox.org/api/forgebox/xml/entries`
- `curl http://www.coldbox.org/api/forgebox/xml/entries?maxrows=20&startrow=20`
- `curl http://www.coldbox.org/api/forgebox/xml/entries?orderby=popular`
